

LUHLUME RADEBE

IT/Information Systems Intern

luhlume@outlook.com | +27 68 415 8240 | Johannesburg, Gauteng

PROFESSIONAL PROFILE

Adaptably resilient Information & Communication Technology graduate specializing in Applications Development and Information Systems. Committed to providing fit-for-purpose IT solutions and first-line technical support to ensure operational continuity. Brings practical experience in software troubleshooting, requirements analysis, and Agile collaboration, with a strong desire to apply technical expertise within the logistics and supply chain environment.

PROFESSIONAL EXPERIENCE

Intern (Software Engineer)

07/2025 – 12/2025

Cloud 7 Solutions, Cape Town

- System Maintenance: Supported the development and maintenance of customized software solutions, ensuring they were functionally complete and fit for purpose.
- Troubleshooting: Managed delivery services and technical troubleshooting, maintaining an 80% client retention rate through high attention to detail.
- Requirements Analysis: Conducted needs assessments to translate user needs into technical specifications, a key skill for IT documentation.
- Resource Management: Independently managed scheduling and decision-making in a fast-paced environment.

Project Team Leader

03/2025 – 11/2025

University Capstone Project (CPUT)

- Agile Project Management: Orchestrated a team of 5 to develop comprehensive business and technical strategies.
- Operational Delivery: Facilitated weekly meetings and managed deliverables against strict deadlines, ensuring 100% on-time completion.
- Data-Driven Design: Synthesized algorithmic research into actionable recommendations for system implementation.

Community Engagement Volunteer

11/2024 – 06/2025

Selinelly, Johannesburg

- Collaboration: Worked with multidisciplinary teams to execute programs, increasing stakeholder engagement by 12%.

EDUCATION

Diploma in Information & Communication Technology (Applications Development)

Cape Peninsula University of Technology (CPUT), Cape Town

- Focus Areas: Information Systems, Technical Strategy, and Data Structures & Algorithms, Software Development.
- Achievement: Delivered high-impact technical presentations to audiences of 50+ peers.

CORE COMPETENCIES & TECHNICAL SKILLS

Technical Support

Troubleshooting, debugging, and maintaining system reliability through rigorous testing.

Systems Analysis

Requirements gathering, business strategy planning, and systems implementation.

Data & Databases

Proficient in SQL and data structures for reporting and system audits.

IT Infrastructure

Basic understanding of Android development concepts and responsive solution design.

Software Proficiency

Java, JavaScript, React, and Advanced Microsoft Office Suite.

Soft Skills

Analytical thinking, professional communication, and 100% on-time delivery of technical tasks.

Projects

AI Job-Matching Engine

09/2025 – 01/2026

An intelligent recruitment platform that scrapes job listings and automatically matches them to student and graduate CVs using advanced scoring algorithms.

This application bridges the gap between fresh graduates and employers by removing the manual effort of searching for entry-level roles. It parses uploaded resumes, extracts key skills, and compares them against live-scraped job postings to generate a compatibility score.

- Tech Stack: Python (Fast API), PostgreSQL / Supabase, Next.js (React), Tailwind CSS & LangChain, OpenAI API
- Features:
- **Automated Job Scraping:** Periodically fetches the latest job listings from top career portals.
- **Resume Parsing:** Uses natural language processing to extract skills, education, and experience from PDF resumes.
- **Smart Ranking System:** A custom algorithm that scores and ranks candidates against job descriptions.
- **Interactive Dashboard:** Clean UI for graduates to view their top matches and track applications.
